

ESTABLISHED 1904

Andover Borough Sussex-Warren Area Energy Cooperative (SWAEC) Program Announcement

July 2024

Dear Andover Borough Resident:

The Sussex-Warren Area Energy Cooperative (SWAEC) was established in 2017 for the purpose of offering residents reduced electricity supply rates by purchasing electricity in bulk for several municipalities through a Community Energy Aggregation Program.

Community Energy
Aggregation is different from
other third-party supply
contracts and offers
protections to you that
individual contracts may not
offer:

- the program rate is the same from month-to-month
- the ability to leave the program at ANY TIME without penalties or fees

The SWAEC originally started with seven towns, including Andover Borough, and has grown over the past seven years to 13 towns throughout Sussex and Warren counties. Savings to residents through the SWAEC Community Energy Aggregation Program totaled over \$2 million between April 2017 and December 2021.

We are proud to announce that as a result of the SWAEC's recent energy auction on May 29, 2024, the Township of Fredon, as Lead Agency for the cooperative, awarded a 15-month contract to IDT Energy, Inc., beginning in September 2024. Municipalities participating in the SWAEC thought it was important to offer a renewable option in this next round of the CEA program, so in addition to the reduced rate of \$0.1119/kWh (referred to as the "Standard Option"), this new CEA program offers residents the option to select 100% Renewable Energy (referred to as the "Green Option") for fractions of a penny more at \$0.1196/kWh.

The following pages contain additional information about the SWAEC's new CEA program, and we have also scheduled a public information session so that everyone can learn more and get their questions answered.

Tuesday, July 23, 2023 at 6:00 p.m. via Zoom https://us06web.zoom.us/j/2711774979?pwd=emFtR0lIcGs3RmJwTEJEU0ZwcGVaZz09&omn=86096424459

In addition, a program video has been posted to the SWAEC Program's web page at https://njaggregation.us/swaec.

As always, residents can call the SWAEC's energy consultants toll free at 866-688-5197 with any questions about the CEA program, to opt-out of the program, and to opt-up to the Green Option.

Sincerely,

Joseph Schocko

Joseph Schocko, III, Mayor

THINGS YOU SHOULD KNOW

This CEA program's Standard Option offers a reduced rate on the supply portion of your electric bill. The Standard Option rate offered will remain the same throughout the term of the contract and is a non-variable rate. The CEA program rate and JCP&L's prevailing Basic Generation Service (BGS) price to compare will be printed on your bill each month, making it easy for you to compare the two rates.

All current services including delivery, meter readings, billing, payments, emergency services, etc., are provided by JCP&L just as they are today, and you'll continue to receive one bill from JCP&L. You can continue to call JCP&L with billing questions, or you can call IDT Energy. Telephone numbers are provided on the enclosed program summary and on your monthly JCP&L bills.

JCP&L does not generate the electricity provided to consumers through their utility. Utilities purchase the electricity through a statewide auction called the BGS auction, which stands for Basic Generation Service. This is the default service all residents receive if they don't select their own third party supplier. Information about the BGS auction can be found at www.bgs-auction.com.

This CEA program offers protections for residents that are generally not available in individual third party supplier contracts. There are no fees to be a part of this CEA program. You may opt out at any time with no fees or penalties, even after the initial opt-out period. If you opted out and wish to reenroll, you can do so at any time, again at no fee. Budget billing will be offered and details are included on the following page.

There is nothing you need to do to obtain the Standard Option rate. Eligible residents will be automatically enrolled in the program at the Standard Option rate unless they choose to opt in to the Green Option of 100% renewable energy or to opt out. The opt-out feature is a mandate of the state's regulations governing this CEA program; an opt-in program is not available for residential service accounts.

Residents receiving financial assistance for their utility bills will continue to receive that assistance when they enroll in the CEA program.

Residents participating in this CEA program at the end of the term will be notified in writing if the program will be continuing at a new rate for a new term or if accounts will be switched backtothe BGS through JCP&L in the event that a new reduced rate can't be offered.

This mailer is sent only to those residents who have not chosen a third party supplier. Residents who already have a third party provider will not automatically be included in the program but can enroll by calling the program's energy consultants at 866-688-5197. Prior to enrolling in the SWAEC, you should contact your current third party supplier regarding early termination fees. In addition, solar customers with net meters will not automatically be included in the program.

This CEA program is overseen by the Board of Public Utilities (BPU) and the Division of Rate Counsel through N.J.A.C. 14:4-6 et seq. Your municipality does not receive any monetary benefit for providing this benefit to residents.

All information regarding this program is mailed through the US Postal Service. No one from the CEA program will call you or knock on your door regarding this program. Please be wary of anyone trying to get your utility account information otherwise. For more information, visit https://njaggregation.us/swaec.

BUDGET BILLING

If you are currently on Budget Billing with JCP&L, you will automatically be enrolled in Budget Billing in this CEA program through IDT Energy, Inc.

Prior to entering the program, you will receive a reconciliation or "true up" bill from JCP&L. This is to bring your account to zero prior to entering the CEA program.

The reconciliation amount may be substantial depending on how much you are over or under on the budgeted amount, and this reconciliation may come as a charge or a credit on your bill.

This new budget amount will be based on your most current usage history for the last 12 months. After six months in the program, IDT Energy may conduct an adjustment to your monthly budget amount to ensure your budget is in line with your usage.

After three months with the program, IDT Energy will conduct a reconciliation or "true up" to keep the amount of money owed to or by you at a manageable level.

If you choose to leave the program, you will be provided another true up which will bring your account to zero prior to leaving the program.

If a new rate is not offered to program participants at the end of this initial contract term, you will receive a reconciliation or "true up" bill on the last bill. Just as above, this will zero out your account prior to returning to the BGS through JCP&L. The resulting credit or charges *may* be substantial if your usage is significantly lower or higher than the prior year.

If you have a credit against your budgeted amount, meaning you used less energy than budgeted for, your credit will be applied to any future charges on your bill.

Any resulting reconciliation charge or "true up" amount represents your usage over and above the amount you were budgeted for and is not for "extra charges". We encourage you to track your usage vs. your budgeted amount so you can stay current on your usage and charges.

If you have questions about budget billing, please call the CEA program's customer care team at 866-688-5197.

PROGRAM DETAILS

How the Program Works: The SWAEC obtained an energy supply rate, referred to as the Standard Option, that is lower than what JCP&L is currently charging Basic Generation Service (BGS) customers.¹ The Standard Option offered in this CEA program is a flat rate and is designed to offer a reduced rate without the risk of unexpected rate increases, unlike variable third party supplier contracts. This means the Standard Option rate will remain the same from month to month throughout the term of the contract. The amount of renewable energy included in the Standard Option meets the minimum requirements of NJ's Renewable Portfolio Standard (RPS).

The SWAEC also obtained an energy supply rate for 100% renewable energy, referred to as the Green Option. The rate for the Green Option is slightly higher than the Standard Option rate.² Residents wishing to enroll in the Green Option must opt in by completing and returning the enclosed green response card.

Electricity Auction Results: An energy auction for the SWAEC's CEA program was held on May 29, 2024, and the results were:

- 1) a Standard Option program rate of **\$0.1119/kWh** offered by IDT Energy, Inc., as compared to JCP&L average Price-to-Compare rate of \$0.117824/kWh at the time of the auction. By way of example, if a resident uses 611 kWh in October 2024, their electricity supply charges through the Standard Option of this program would be \$68.37 as compared to the \$71.99 they would have paid through JCP&L's BGS; and
- 2) a Green Option program rate of \$0.1196/kWh offered by IDT Energy, Inc., as compared to JCP&L average Price-to-Compare price of \$0.117824/kWh at the time of auction. Using the above example of 611 kWh, the electricity supply charges through the Green Option of this program would be \$73.07 as compared to \$71.99 through JCP&L's BGS.

The Standard and Green Option program rates go into effect with your **September 2024** meter read and will continue through your **November 2025** meter read. You will see the change in your electricity supplier to IDT Energy and the new program rate on the JCP&L bill you receive in October 2024.

JCP&L will continue to deliver your electricity, and JCP&L will continue to bill for delivery and supply charges, just as they do today. JCP&L will continue to provide all emergency and safety services. JCP&L will also continue to provide customer services such as meter reading, billing³ and service restoration. You will also continue to only receive one bill from JCP&L, and continue to pay JCP&L.

In accordance with the State's program requirements, as an Andover Borough resident who has not chosen a third party supplier for your electric supply, you will be automatically enrolled in this program at the Standard Option rate of \$0.1119/kWh and receive the anticipated energy savings **unless you:**

- 1) indicate your desire to opt in to the Green Option at a rate of \$0.1196/kWh by completing and mailing the enclosed green response card or calling the program's customer care team toll free at 866-688-5197 by 8/15/24, or
- 2) indicate your desire to not participate by completing and mailing the enclosed opt-out response card by 8/15/24, by calling 877-292-3904 toll free (please note that wait times may be longer during high call time periods and please have your bill handy), or by visiting https://njaggregation.us/swaec.

Once enrolled in CEA program, you may leave at any time, and you will never incur fees or penalties for leaving or reenrolling in the program.⁴ For questions and more detailed information or if you received this mailing in error, please call the CEA program's customer care team toll free at 866-688-5197.

¹ JCP&L rates may increase or decrease during the course of this program, which would affect the anticipated level of customer savings. Savings cannot be guaranteed over the term of the agreement. JCP&L charges can change quarterly and are posted on the web.

^{2.} CEA programs providing electricity supply containing a percentage of class I and class II renewable energy that exceeds the applicable percentage required under the RPS may set a rate for such service that is higher than the utility's BGS price-to-compare (N.J.A.C. 14:4-6.9(g)).

³ Other billing arrangements may apply for customers who do not remain current with their bills.

⁴ Leaving the program is subject to the timing of meter readings and typically takes 1-2 billing cycles.

IDT Energy, Inc. (IDTE) Third Party Supplier Contract Summary

SUSSEX-WARREN AREA ENERGY COOPERATIVE - MUNICIPAL AGGREGATION PROGRAM PARTICIPANTS
