

Hoboken Renewable Energy Program

Community Energy Aggregation Program – Directions for Online Access to Program Enrollment

Step 1: Access the program's online savings tool, for the Green Option (100% renewable energy), Standard Option (10% additional renewable energy) and Basic Option (no additional renewable energy than is required by the New Jersey Renewable Portfolio Standard), by setting up and/or logging into your account on the program's web page at hobokennj.gov/renewableenergy

Step 2: Find the word "Login" in the upper left corner of the web page, and the drop-down arrow. Click the drop-down arrow and select "Residential Log In". Select PSE&G from the list of utilities, enter your 20-character PSE&G POD ID number (starts with "PE") as your account number. If this is your first time accessing your account through the web page, you will click on the link to "Set For First Time Login or Change Password". Note, if you have already set up a Password, you will need to enter it in the field labeled "Password".

Step 3: Once you've accessed your account, you will see information related to your account including your 20-character PSE&G POD ID number, the name and address associated with your utility account, your current level of participation in the Hoboken Renewable Energy Program, be it the Green Option, Standard Option, or Basic Option. Change your program option by clicking on the drop-down arrow next to the red "Change Rate" button.

Step 4: Click on the new program option in which you'd like to enroll. Your request will be sent to Concord Energy Services, the energy consultants for the Hoboken Renewable Energy Program, and Concord will then notify Constellation NewEnergy, Inc. (the supplier for the current contract term) and PSE&G that you'd like to enroll your account at a different program option. This change will be made within 1-2 billing cycles, depending on when your request is received and the date of your next meter read cycle.

Notes:

Once you've accessed your account online, you will also see information related to your savings through the Hoboken Renewable Energy Program. A chart provides usage information, the PSE&G Basic Generation Service (BGS) price, the program rate you selected, and the difference between the utility's BGS price and the program rate in each month that you have participated in the program.

Underneath your savings/cost comparison chart is a graph that tracks your monthly usage. This graph may be helpful in identifying patterns in your usage which may be useful when budgeting for your energy costs.
